

INTEGRATED MANAGEMENT SYSTEM

Environmental requirements for suppliers and subcontractors:

- Supplier and subcontractor are obligated to comply with all applicable environmental laws and regulations.
- The supplier provides vehicles that are in good working order and meet all emission standards.
- Supplier of the hazardous substance or mixture is obliged to deliver to ZKS Łabędy sp. z o.o. Material Safety Data Sheet of this substance or mixture, in Polish, at latest on the day of delivery.
- Supplier should strive to minimize the negative environmental impact of its activities at every stage of its products life cycle.
- Subcontractor is obliged to have the environmental permits or permissions required by the applicable laws, which are necessary for proper realization of the contract.
- Subcontractor is obliged to work with respect for the environment, ie with none or minimal emissions to the environment.
- All hazardous substances and mixtures used by the subcontractor while working for and at the premises of ZKS Łabędy sp. z o.o. must have original and legible markings on the packaging (pictograms).
- The storage of hazardous substances and mixtures at the place of work must be organized by the subcontractor in such a way, that they do not endanger the environment and the people.
- The subcontractor is obliged to possess the safety data sheets for the substances and mixtures used in his work.
- Waste made during work carried out by the subcontractor must be collected selectively.
- The maker of the waste generated during the work carried out by the subcontractor for and at the premises of ZKS Łabędy sp. z o.o., in accordance with the applicable legal regulations, is the subcontractor, and therefore the subcontractor is obliged to remove the waste, unless the contract stipulates otherwise.
- The subcontractor is obliged to use in ZKS Łabędy sp. z o.o. machines and equipment which are in good technical condition and meet all emission standards.
- The subcontractor is responsible for any environmental damage caused by its activity.
